Art Unit: 2653

1) The amendment filed 7/01/2005 is acknowledged.

2) The I.D.S filed 8/04/2005 has been considered by the Examiner. However, the Japan and/or foreign document(s), if they have not been written in English, are considered to the extent that could be understood from the English Abstract and the drawings.

Form PTO-1449 or PTO/SB/08 is(are) attached herein.

3) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

4) (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5) Claims 1,2,4,8,9,11-16 are rejected under 35 U.S.C. 102(b) as being anticipated by NONAKA ( 5,471,441 ).

The rejections of claims 1,2,4,8,9,11-16 in previously Office action ( mailing date of 4/14/2005 ) is repeated herein.

6) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

7) Claims 3,5-7 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over NONAKA ( 5,471,441 ).

The rejections of claims 3,5-7 and 10 in previously Office action ( mailing date of 4/14/2005 ) is repeated herein.

8) Applicant's arguments filed 7/01/2005 have been fully considered but they are not persuasive.

Applicant states that " NONAKA et al does not disclose transmitting the set sub-code data to a host computer. NONAKA et al discusses a CD player capable of playing back a partially recorded CD, not transmitting sub code data to a host computer " (claims 1-15). This is not found persuasive.

The fact is that NONAKA et al discloses a CD player capable of playing back a partially recorded CD does not mean that the CD player is not transmitting sub code data to a host computer as applicant's argued. The question is that, during reproducing process the host computer 7 in NONAKA et al's CD player ( figure 5 ) requests the sub-code data from buffer 7A or not, the answer is YES.

As seen in column 8, lines 17-48 and figure 5, the audio-data decoding section 6A also outputs control data D<sub>CN</sub> included in a sub-code to the control-data decoding section 6B. The decoding section 6B decodes the

Art Unit: 2653

control data  $D_{CN}$  and outputs the resultant data to the system controller 7. The NONAKA et al's CD player clearly shows the step of transmitting the set sub-code data to a host computer as claimed.

For that reason, the claims are still rejectable as shown above.

9) THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
